Mr. Robert Ogg, Chief  
Site Investigation and  
Compliance Branch  
Environmental Protection Agency  
26 Federal Plaza  
New York, New York 10278

Dear Mr. Ogg:

This refers to our April 8 letter transmitting comments to you on the Asbestos Dump Site in Morris County, New Jersey.

It is my understanding that EPA signed an agreement with the responsible party without incorporating studies requested in our letter. I also understand that omission of our recommended studies was not intentional, but simply an unfortunate oversight.

The Service expended considerable time and energy formulating comments on this project and believes the recommended studies are needed. I would appreciate your thoughts on how to incorporate these studies in the clean-up process so that the Service may eventually exercise its responsibilities under CERCLA in regard to the Great Swamp National Wildlife Refuge.

Sincerely,

A handwritten signature in cursive script, reading "Charles J. Kulp", is written over the typed name.

Charles J. Kulp  
Field Supervisor
